EasyUse LPC
Project collaboration tools

Project Purpose	Tool Name	Description
Team collaboration	Miro	Think of it as a virtual project board, great for remote collaboration on any sessions where you might have used sticky notes or a whiteboard to collaborate physically
Project document / file storage	Dropbox	Shared cloud based file storage for documents and the files for the project team
Document collaboration	Dropbox Paper	Shared cloud-based real-time document collaboration, great for sharing ideas across the team remotely
Source control & ticket workflow	GitHub	Cloud-based source control repository, shared across the team (EasyUse, WD, Topcoder). Also implements customisable ticket workflow for sharing the project Kanban board
Source control & ticket workflow	ZenHub	More advanced features for reporting and workflow than GitHub, we'll evaluate processes and switch to ZenHub if we find we need the features it offers
Team collaboration/instant messaging	Slack	Share ideas and updates with the team across WD and Topcoder
Topcoder collaboration	Connect	Topcoder Connect is a web application that makes it easy to tap into the power of crowdsourcing to get more work done faster
